

## **Pari Dialogue in 7 Points**

**How can a Pari Dialogue add value to you or to your organization? By combining:**

### **1. Uniquely Qualified Dialoguers coming together...**

**Pari Dialogues** bring together key people in your organization with a hand-selected group of professional dialoguers from different sets of expertise and experience; the shared goal is to focus on your organization's critical themes.

### **2. To apply the Pari Dialogue Process...**

To guarantee the integrity of the dialogue process, and outcomes, friends of Pari and Pari Dialoguers are committed to the Pari Dialogue process, evolving as time goes on to respond to our ever changing environment. (Note that the Pari Dialogue process is not the same as the Bohmian Dialogue).

### **3. In a Unique Place...**

The Pari Dialogue process works, in part, because of the location – Pari is a village that allows people to feel contained. We hold the space that allows people to feel trust, to be more creative, and to speak openly, to feel there is no fixed agenda, no overarching sense of judgment and no goal that must be reached at any particular time. The location is like an alchemical vessel that contains and allows for transformation.

### **4. All supported by the Pari Center for New Learning and its environment of Gentle Action**

The Pari Center for New Learning itself evolved from a Pari Dialogue. It is an independent not-for-profit organization dedicated to education, learning and research, and favouring a gentle approach to learning known as "Gentle Action."

### **5. The experiment of having no set goals and experiencing the natural rhythm**

Not setting goals for the outcome is one of the most enriching elements of the Pari Dialogue. It makes us aware of the process, it opens our listening and it allows us to see the huge potential an open dialogue can enable beyond the obvious. The dialogue goes as it goes, following whatever path that is needed.

### **6. Embracing the unknown**

The Pari Dialogue is dependent on diversity. The dialoguers chosen to join you are often people from completely different worlds and disciplines than you usually work with.

### **7. Endorsing positive social impact**

The Pari Dialogues, themselves, have this aspiration and as well, any profit from the dialogues will be directed to that same purpose.
